

Request for Confidentiality of Material Submitted in Relation to

Licence Renewal Application for Cameco's Port Hope Conversion Facility

This form supports the [Directive on Requesting Confidentiality](#). Review the Directive for important information about completing this form and the documents that must be submitted with it.

The completed form and attachments **must be submitted to** the [Commission Registrar](#).

With regard to: **Licence Renewal Application for Cameco's Port Hope Conversion Facility**

I, Liam Mooney, am an authorized representative of Cameco Corporation, Port Hope Conversion Facility. I understand that:

- material provided to the Canadian Nuclear Safety Commission ("the Commission") as part of a public hearing will be made publicly available unless the Commission makes a decision to protect it; and
- regardless of any request for confidentiality and decision by the Commission, the material may be disclosed if the Commission is required by law to disclose it (for example, after a request under the [Access to Information Act](#)).

I hereby request that the Commission take measures to prohibit the publication and disclosure of the following information under rule 12 of the [Canadian Nuclear Safety Commission Rules of Procedure](#) (the Rules).

NOTE 1: Any additional protective measures being requested must be identified in a letter attached to this form.

Material for which a request for confidentiality is submitted:

The material that is subject to this request for confidentiality is clearly identified in Table 1, below.

NOTE 2: Where the request for confidentiality applies only to part of a document, relevant portions must be clearly identified "CONFIDENTIAL" to distinguish them from content that is non-confidential.

NOTE 3: The Commission is not responsible for any copyright infringement due to its publication on the CNSC website of documents that have been written by a third party.

Table 1: Material subject to the request for Confidentiality				
	Item Name	Portion(s) covered by the Request for Confidentiality	Applicable Criteria Check all that apply	Rationale Explain how the criteria in Rule 12 applies and how the summary or redacted version satisfies the public interest
1.	Cameco Corporation, Port Hope Conversion Facility, Environmental Risk Assessment for the Cameco Port Hope Conversion Facility, March 2016	☒ Entire content ☐ Redacted content as clearly identified in the document	☐ The information involves national or nuclear security elements ☐ The information pertains to Indigenous Knowledge The information is: ☐ Financial, ☒ Commercial, ☒ Scientific, ☒ Technical, ☐ Personal, or ☐ Other (specify), and ☐ Is consistently treated as confidential and the person affected has not consented to disclosure. Or: ☐ Disclosure of the information would likely endanger the life, liberty, or security of a person or person(s)	The information contained in the 2016 Environmental Risk Assessment (ERA) Report should be restricted or prohibited pursuant to paragraph 12(1)(b) of the Canadian Nuclear Safety Commission Rules of Procedure for the following reasons: The 2016 ERA contains confidential scientific and technical information that is consistently treated as confidential by Cameco and was provided to the CNSC in confidence. The report includes detailed, site-specific environmental data, modelling approaches, contaminant characterization, exposure assessments, and risk characterization methodologies. Disclosure of the detailed models, methodologies, assumptions, and supporting data could prejudice Cameco's competitive position by revealing proprietary approaches to environmental risk assessment and facility-specific environmental management practices that are not otherwise publicly available. The ERA includes information describing facility infrastructure, emission sources, environmental control systems, and contaminant pathways. Public disclosure of this information could reasonably be expected to reveal sensitive details related to facility configuration and environmental risk pathways.

Table 1: Material subject to the request for Confidentiality				
	Item Name	Portion(s) covered by the Request for Confidentiality	Applicable Criteria Check all that apply	Rationale Explain how the criteria in Rule 12 applies and how the summary or redacted version satisfies the public interest
				The report also incorporates information and technical contributions from third-party consultants that are subject to confidentiality obligations and were not intended for public disclosure. All information covered by this request is consistently managed as confidential within Cameco and is not available through public sources. Cameco has made a summary version of the ERA publicly available, which provides a summary of the assessment findings, approach, and conclusions sufficient to support public understanding, while excluding detailed proprietary, technical, and site-specific information.

Request for Confidentiality

2.	Cameco Corporation, Port Hope Conversion Facility, Site-Wide Environmental Investigation Report	☒ Entire content ☐ Redacted content as clearly identified in the document.	☐ The information involves national or nuclear security elements ☐ The information pertains to Indigenous Knowledge The information is: ☐ Financial, ☒ Commercial, ☒ Scientific, ☒ Technical, ☐ Personal, or ☐ Other (specify), and ☐ Is consistently treated as confidential and the person affected has not consented to disclosure. Or: ☐ Disclosure of the information would likely endanger the life, liberty, or security of a person or person(s)	The information contained in the Site-Wide Environmental Investigation Report (SWEIR) should be restricted or prohibited pursuant to paragraph 12(1)(b) of the Canadian Nuclear Safety Commission Rules of Procedure for the following reasons: The SWEIR contains confidential scientific and technical information that is consistently treated as confidential by Cameco and was provided to the CNSC in confidence. The report includes detailed site investigation data, contaminant delineation results, hydrogeological characterization, and interpretation of soil, groundwater, and surface water conditions across the PHCF site. Disclosure of detailed investigation methodologies, analytical results, and site-specific interpretations could prejudice Cameco's competitive position by revealing proprietary approaches to environmental investigation, data integration, and site characterization that are not otherwise publicly available. The SWEIR includes detailed descriptions of facility areas, subsurface conditions, contaminant source areas, and groundwater flow and transport pathways. Public disclosure of this information could reasonably be expected to reveal sensitive details related to site configuration and contaminant migration pathways. The report also incorporates information and technical contributions from third-party consultants that are subject to confidentiality obligations and were not intended for public disclosure. All information covered by this request is consistently managed as confidential within Cameco and is not available through public sources.
----	---	--	--	--

Attestation:

1. I confirm that the above-noted material is not available through any public sources.
2. I have attached a **summary** or **redacted** version of the material that minimally impairs the public nature of this proceeding.
3. I understand that if this request is not approved by the Commission, I will have the option of withdrawing the material.
4. I further understand that if the material is not withdrawn it will be part of the public record as per rule 15 of the Rules.
5. I understand that upon receipt of this request, the Commission Registrar will treat the material that is subject to this request as confidential unless and until the Commission makes a ruling.
