RE: OPG Application to renew the Power Reactor Operation License and the Pickering Waste Management Facility license for 10 years

Canadian Nuclear Safety Commission (CNSC)

To whom this may concern,

I am writing to advocate on behalf of Gurley Leadership Solutions in full support of Ontario Power Generation's (OPG) application to renew the Pickering NGS's Power Reactor Operating License (PROL) and the Pickering Waste Facility Operating License (WFOL) for a 10-year term from January 1, 2027 to December 31, 2036. We understand that during this term, OPG plans to refurbish Units 5 to 8 to support continued operations for 30-plus years and progress the decommissioning of Units 1 to 4.

For the province of Ontario, the Pickering Nuclear plant serves as a crucial provider of clean, safe, reliable, and cost-effective electricity. We firmly believe that OPG is committed to maintaining public safety as its utmost priority and will uphold the highest standards of safety in plant operations.

OPG has consistently demonstrated its dedication to open and transparent communication with local businesses and the wider community. We trust that OPG has the expertise to refurbish the four units and operate them safely for another 30+ years.

As a long-time resident of Ajax and a business owner deeply rooted in the community for over 35 years, I have full confidence in the proximity of operating alongside the Pickering Nuclear facility. I wholeheartedly support the extension of the operation of units 5 to 8 to meet Ontario's energy demands.

Thank you for considering our advocacy on this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "M. Gurley", with a stylized flourish at the end.

Malcolm Gurley
