July 20, 2026

Matheis Financial Group (MFG) is pleased to offer its full support for Ontario Power Generation's (OPG) application to renew the Pickering Nuclear Generating Station's Power Reactor Operating Licence for the period of January 1, 2027, through December 31, 2036.

As our business celebrates more than 40 years in Pickering, we are grateful for the tremendous support we have received from our community. We are equally proud to support organizations that contribute to the long-term strength and prosperity of Durham Region. OPG has consistently demonstrated a transparent and collaborative approach in engaging with local businesses, residents, and community stakeholders, giving us confidence in their plans for the future.

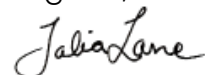

The proposed licence renewal will allow OPG to refurbish Units 5 to 8, securing more than 2,100 MW of clean, reliable electricity for Ontario for another 30-plus years while continuing to safely provide approximately 10 percent of the province's electricity needs. The project will also support thousands of highly skilled jobs, strengthen the Canadian supply chain, and generate significant economic benefits across Ontario.

MFG has always been committed to environmental sustainability, and we appreciate OPG's continued dedication to producing virtually emissions-free electricity while maintaining a strong focus on environmental stewardship and biodiversity. Their commitment to balancing reliable energy production with responsible environmental practices aligns with our own organizational values.

We are confident that OPG will continue to meet the highest standards of safety, environmental responsibility, and operational excellence throughout the proposed licence term, including the refurbishment of Units 5 to 8 and the continued safe management of nuclear waste at the Pickering site.

For these reasons, Matheis Financial Group is pleased to support OPG's application to renew the Pickering Nuclear Generating Station's operating licence.

Regards,

Talia Lane
