CRPA-CNSC Working Group CRPA WG Member Comments

Regulatory Oversight Report on the Use of Nuclear Substances in Canada: 2024

Submitted by:

Jeff Dovyak RTNM, CRPA(R)
CRPA Co-Chair
CRPA-CNSC Working Group
19 JAN 2026

Internal stakeholders polled in preparing our comments included:

- CRPA members of the CRPA-CNSC Working Group that was formed in 2014
 - Trevor Beniston, Stephane Jean-Francois, Julianna Liberatore and Jeff Dovyak.

Comments

Unlike past years we don't have a lot of comments on the 2024 RoR.

Changes since last review

The majority of CRPA reviewers appreciate this section and commented very favorable internally.

5.3 Radiation protection

The **still continuing** declining trend in the Radiation Protection SCA for the Nuclear Medicine sub-sector continues to be a significant concern to us.

At least one of the CRPA reviewers has flagged this to his work organization's RSOs and leadership.

8.0 Reportable events

Table 28 Reportable events in 2024

This table is useful, most of us use some of the incidents listed during internal teaching/training session.

Appendix K - Stakeholder Engagement

As stated in our many comments to the previous RORs, CRPA members continue to find CNSC outreach sessions very worthwhile and CNSC staff presentations and participation, whether in-person or virtual priceless.

Participation/presentations of CNSC staff in our Annual Conference continues to be a key, valuable part of the conference.

Commendations

We wish to once again acknowledge our appreciation for CNSC staff involvement with stakeholder engagement generally.
