**Re:** Public Hearing Notice Canadian Nuclear Laboratories

December 8, 2017

Ref. 2018-H-01

The letter is in support of the renewal of the licensing for Canadian Nuclear laboratories, in Chalk River in association with the hearing on Jan 24-25 2018 at Best Western in Pembroke Ontario.

The local branch of the Canadian Cancer Society and C.N.L. have been in a Community Partnership for over a Decade now and the support we receive is absolutely incredible and vital in the fight against cancer.

C.N.L., its Management, staff, and partners, have effectively helped get thousands of cancer patients to their treatments through our Wheels of Hope program using our annual Relay for Life and other events we have as a vehicle to do so. They have provided much needed education as to how things work at the plant which provides the community with the knowledge we need to give us the confidence of have a nuclear facility in our back yard.

The team at CNL as I see it, is providing valuable products and services at the Chalk River facility and continues to build trust, relationships and corporate responsibilities within the region.

The Jobs that are created through CNL not only provide families with the security they need to raise families in the area, but also provide economic benefits to the entire region. These jobs create more housing, tax base, local spending and many other monetary and social benefits.

We welcome the renewal of their License, and look forward to the many years of partnering with them in the fight against cancer and continued learning of an and all changes that happen at CNL.

Thank You  
You are truly making a difference!

Roger K. Martin  
Community Office Manager  
Renfrew County  
Canadian Cancer Society
