Canadian Nuclear Safety Commission

To whom it may concern:

I am writing concerning the licence renewal application that has been made by Canadian Nuclear Laboratories (CNL) for its Chalk River facility.

As the Dean of Algonquin College's Pembroke Campus, I am fully aware of the significant contributions that CNL makes to the economic well-being of the region both our organizations support, as well as the significant opportunities the Chalk River Laboratories provide to our students and graduates. As a major employer in Renfrew County, CNL has provided exceptional work placement and co-op experiences for our students, and has hired hundreds of our graduates.

The College and CNL have a long history of collaboration, as demonstrated in the development of Canada's first Applied Nuclear Science and Radiation Safety Diploma program. This important program supports the workforce needs of the country's nuclear sector. CNL actively participates on the college's program advisory committees and also supports Algonquin's outreach programs to engage high school students in career exploration.

For these reasons, I am pleased to offer my support of CNL's licencing application, and look forward to continuing our relationship with this leading science and technology company.

Sincerely,

Karen K. Davies

Dean
