Hello

Thank you for the opportunity to comment on the draft RPR regulations published in the June 15 edition of the Canada Gazette , Part I.

In reading through the document, I would like to ask a question regarding Schedule 2 (Subsection 1(1)) Radiation Weighting Factors found on the page with the heading Canada Gazette PartI, Vol. 153, NO. 24 2700. I have attached a screen shot of this table.

Would it be possible to identify which item would include protons? I do not see protons explicitly listed, while neutrons seem to appear twice.

Perhaps Schedule 2 could be reviewed?

Thank you for considering this observation.

best regards

Michael Evans
