Subject: Comment on Draft RD/GD-338, Security Measures for Sealed Sources

Three comments:

- 1) Subsection 2.1 – does the document apply *only* to the substances identified in Table A? (TECDOC-1344 refers to several other radioisotopes).
- 2) The last paragraph of 2.2.1 might be better placed in subsection 2.1.
- 3) In the glossary under handheld tools – for those of us not up on the latest terminology it might be well to explain the meaning of “burn bar”; maybe by saying “burn bars, also known as oxygen lances”. (A “burn bar” is also a place with a particular décor where booze is sold).
