Dear Sir/Madame:

RE: Draft REGDOC-1.4.1 Licence Application Guide: Class II Nuclear Facilities and Prescribed Equipment

Thank you for the opportunity to comment on this draft.

1. We do not believe that it is the responsibility of the Radiation Safety Committee (RSC) to “review and approve a budget for radiation safety and related training” as described on page 34 section D.1.4. In our case it is the RSC’s role to advise Senior Management and/or the Applicant Authority what additional resources are required for Radiation Safety (e.g. funds for training, equipment and instruments, refresher training, etc).
2. We appreciate the fact that Appendix H: Classes of Nuclear Substances (page 86) now refers to F-18, C-11, O-15 and N-13 as class C nuclear substances.

Sincerely,

Kellie Franz, BSc.

Radiation Safety Officer and Senior Technologist
Winnipeg Cyclotron Facility
