

Revised Notice of Public Hearing and Participant Funding

April 12, 2024

Ref. 2024-H-07
Revision 1

CNSC to conduct public hearing on application from Canadian Nuclear Laboratories Ltd. for 3-year renewal of decommissioning licence for Whiteshell Laboratories site

The Canadian Nuclear Safety Commission (CNSC) will hold a public hearing to consider an application from Canadian Nuclear Laboratories Ltd. (CNL) for a 3-year renewal of its nuclear research and test establishment decommissioning licence for the Whiteshell Laboratories site. The Whiteshell Laboratories site is located in the municipality of Pinawa, Manitoba, and in the homeland of the Red River Métis, Treaty 1 and Treaty 3 territories and the traditional territory of the Anishinaabe and Ojibway Peoples. **This revised notice is to announce that the hearing will now be held virtually only.**

The current decommissioning licence for CNL's Whiteshell Laboratories site is valid until December 31, 2024. The licence authorizes CNL to conduct decommissioning activities at the Whiteshell Laboratories site, including the decommissioning of the Whiteshell Reactor #1 (WR-1), waste management areas, storage facilities, and other nuclear and non-nuclear buildings. In its licence renewal application, CNL is not requesting the authorization of any new licensed activities.

With respect to the decommissioning of WR-1, the decommissioning approach authorized under the current licence is a complete dismantlement and removal of the facility. In its licence renewal application, CNL indicates that it intends to submit a separate licence amendment application related to the potential *in situ* decommissioning of WR-1. As a result, consideration of the potential *in situ* decommissioning of WR-1 is out of the scope of this licence renewal hearing.
