Dear Commission Secretariat,

**Re: Bruce Power Licence Renewal Reference 2018-H-02**

The Town of South Bruce Peninsula fully supports the application from Bruce Power Inc. (Bruce Power) to renew its Nuclear Power Reactor Operating Licence for the Bruce Nuclear Generating Stations (NGS) A and B for a period of 10 years.

The renewed licence would provide greater long term stability to the regional economy of Bruce County and its member municipalities. Bruce Power has and continues to be an outstanding corporate citizen of our region providing over 22,000 direct and indirect jobs through 2064, including residents of our communities.

Since 2011, Bruce Power and its affiliates have donated approximately \$10 million to support community programs, including over \$130,000 of direct funding to community projects in the Town of South Bruce Peninsula. This funding has supported projects including, but not limited to, community event, a splash pad, playground equipment, community centres, Spring Creek rehabilitation, and a skateboard park.

For several decades Bruce Power has been an economic driver for the region providing enormous benefits to Bruce County and the Town of South Bruce Peninsula. It has demonstrated time and time again its corporate responsibility to the community, environment, economy, and social issues that affect our region.

According to Bruce County statistics there are over 4,200 full time Bruce Power employees of which 48 reside in South Bruce Peninsula. Projections indicate that 150-200 employees will be required over the next 10 years to meet retirement and attrition rates alone. A further 2000-3500 maintenance and trade persons will be required for the next several years. For every 1 job created there is a 2.04 multiplier effect for jobs created in our communities. This means 4,280 to 7,140 new jobs for our region, many of which may be direct residents of our municipality.

Our region, and particularly our municipality, desperately needs these employment opportunities in order for us to continue to remain vibrant and prosper. Failure for Bruce

Power to remain as an economic driver in our region will have a devastating impact on our communities.

In summary, Bruce Power has and continues to be an outstanding corporate citizen to our region, providing community support and economic vitality. The Town of South Bruce Peninsula fully supports Bruce Power's application to renew its Nuclear Power Reactor Operating License for Nuclear Generating Stations A and B.

Should you have any question please feel free to contact the undersigned.

Yours truly,

A handwritten signature in blue ink, appearing to read 'BRAD MCR', with a long horizontal flourish extending to the right.
