To the CNSC staff and Commission,

Please accept this as my written intervention and request to participate in the hearing in regards to the relicensing of the Toronto BWXT uranium factory at 1025 Lansdowne Avenue.

If the CNSC claims to be impartial and transparent why will it not require BWXT to demonstrate to the public that it is properly insured beyond the response of "proprietary" information?

What is the worst case scenario involving the hydrogen tank that holds 9000 gallons?

Why is the public not entitled to these answers according to the CNSC?

Furthermore, how many people live within 300 metres, 500 metres, 1000 metres, and 2000 metres of the plant?

How many people have been informed and what evidence does the CNSC provide to show the number of people that have been informed?

How has the CNSC advertised the licence renewal?

Please also provide documentation on all the communications released by BWXT to the local community including distances, numbers of homes, and copies of all printed communication.

Thank-you for your cooperation,

Zach Ruiters
