Please do not renew the license of BWXT to process uranium at 1025 Lansdowne Ave., Toronto. Uranium is toxic, carcinogenic, and radioactive and it is extremely dangerous to have a uranium processing facility in a residential neighbourhood in the middle of Toronto, a densely populated city. Uranium dioxide and liquid hydrogen are both highly flammable and, if a train were to derail on the busy railway line just north of Dupont, the result would be catastrophic.

Please move the uranium processing facility to a non-populated area, if possible, or best of all, please switch to healthy and much cheaper hydro, solar, or wind energy.

Maggie Robertson
Thank you.
