To whom it may concern,

My wife and I live within 400m of the BWXT Nuclear Facility at 1025 Lansdowne Ave.

We respectfully find issue with BWXT being granted another 10 year license to operate at 1025 Lansdowne.

The area has changed dramatically since the last license was granted. Thousands more now live within a 500m radius of the factory. Over the next 10 years that number will grow significantly higher, and likely more than double. Just across the street on Lansdowne, less than 100m away, there is a plan to have another 1,085 residences, including a day care.

I do not believe there is any reason why a facility like this should be in a highly concentrated, growing residential area. There is no reason to be taking this unnecessary risk. The reality of the situation is everyone makes mistakes, mistakes happen, as we can all attest. I know I would not want to be held accountable for granting BWXT a 10 year extension on their license and having something avoidable and tragic happen.

Thank you for your time.

Best,
Jon
