Dear Canadian Nuclear Safety Commission,

Please count this as my written intervention with the intention to make an oral presentation in the upcoming licence renewal hearings of BWXT Toronto. I live right across the street from the Bwxt Uranium Plant. I found out about this in 2019. I will be attending the oral presentation on March 2-3, 2020 at the CasaDo Alentejo Community Centre at 1230 Dupont Street.

Priscilla Medeiros

Dear Canadian Nuclear Safety Commission,

This is my written intervention.

I live right across the street from the Bwxt Uranium Plant. I was devastated to find out in 2019 that I am living across the street from an Uranium Plant. My balcony looks over at the site.

I feel that BWXT needs to move knowing all the health hazards pertaining to the neighbourhood and children. Inhalation of Uranium Dioxide is Toxic, over prolonged periods of exposure can cause major health issues. Especially living in the vicinity of the plant.

My child goes to Perth Public school along with other innocent children just down the street from this Uranium Plant. We do not feel safe whatsoever! Uranium Dioxide is highly flammable, and can ignite upon coming into contact with air. How is any of this safe with flammable liquid hydrogen next to an active rail line, which I live and many others right beside the rail tracks.

Where is your safety evacuation plan for the public? Are you insured?

This has gone way too long, BWXT is no longer welcome in our community. It is time to move elsewhere or Shut Down and stop hurting innocent people and children who live here and want to stay.

Signed

Priscilla Medeiros
