Hello,

My name is Stanley Yoo. Nuclear accidents have happened in the past. Don't be the people who let another one happen. Please safely shut down this plant and seek safer greener energy sources. i.e. Quit while the City of Toronto is ahead. Don't play with fire.

I also signed this petition that has 1,417 people:<https://www.change.org/p/justin-trudeau-stop-bwxt-s-license-renewal-shut-down-the-uranium-processing-plant> Before recently, I assumed nuclear plants were far away from people's homes for safety reasons. But apparently that's not always true. And with that recent amber-alert on that nuclear plant thing in Pickering, makes me worry about safety. Doesn't make Canada seem like the best place to live, to be honest.

Please shut it down safely and look for safer greener energy alternatives. What challenges are preventing the shutdown of this plan? I'm open to listening. Feel free to email me.

Thank you,

Stanley Yoo.
