**Re: Darlington New Nuclear Project Power Reactor Site Preparation
Licence Renewal Application**

Dear Commission Members,

I write to you today in full support of Ontario Power Generation's (OPG) Darlington New Nuclear Project (DNNP) Power Reactor Site Preparation Licence (PRSL) application renewal.

Cameco's vision is to *Energize a Clean Air World*. The construction of new nuclear electricity generation facilities, as contemplated by OPG in their application, is both in alignment with this vision and will further our continued efforts as a society to combat climate change. This project has the potential to position Canada as a global leader in advanced nuclear electricity generation along with re-affirming the leadership position of the Ontario nuclear supply chain.

OPG has deep roots in Ontario and continues to be a leader in community support and development. OPG remains connected to the community through regular and open dialogue, the distribution of print communication and, prior to the COVID-19 pandemic, offering station tours and giving presentations to local community groups and councils. The various forms of community initiatives, outreach and the execution of ecological and biological assessments in support of OPG's DNNP application, reaffirm their dedication to community well-being.

In summary, the positive impacts that OPG's operations have had is well recognized. The DNNP will not only create many additional future direct and indirect jobs in the nuclear industry, but it will also contribute to securing the future of nuclear power generation at the Darlington site for many years to come. I have the utmost confidence that OPG's Darlington Nuclear site remains suitable for a new Nuclear Generating Station and am pleased to support OPG's PRSL 10-year licence application. I look forward to continued progress on the DNNP.

Sincerely,

A handwritten signature in black ink that reads "Dale Clark".

Dale Clark
Vice-President
Cameco Fuel Services Division
