Energizing a clean-air world

McClellan Lake Licence Amendment: JEB TMF Expansion

October 4, 2021

Cameco Overview

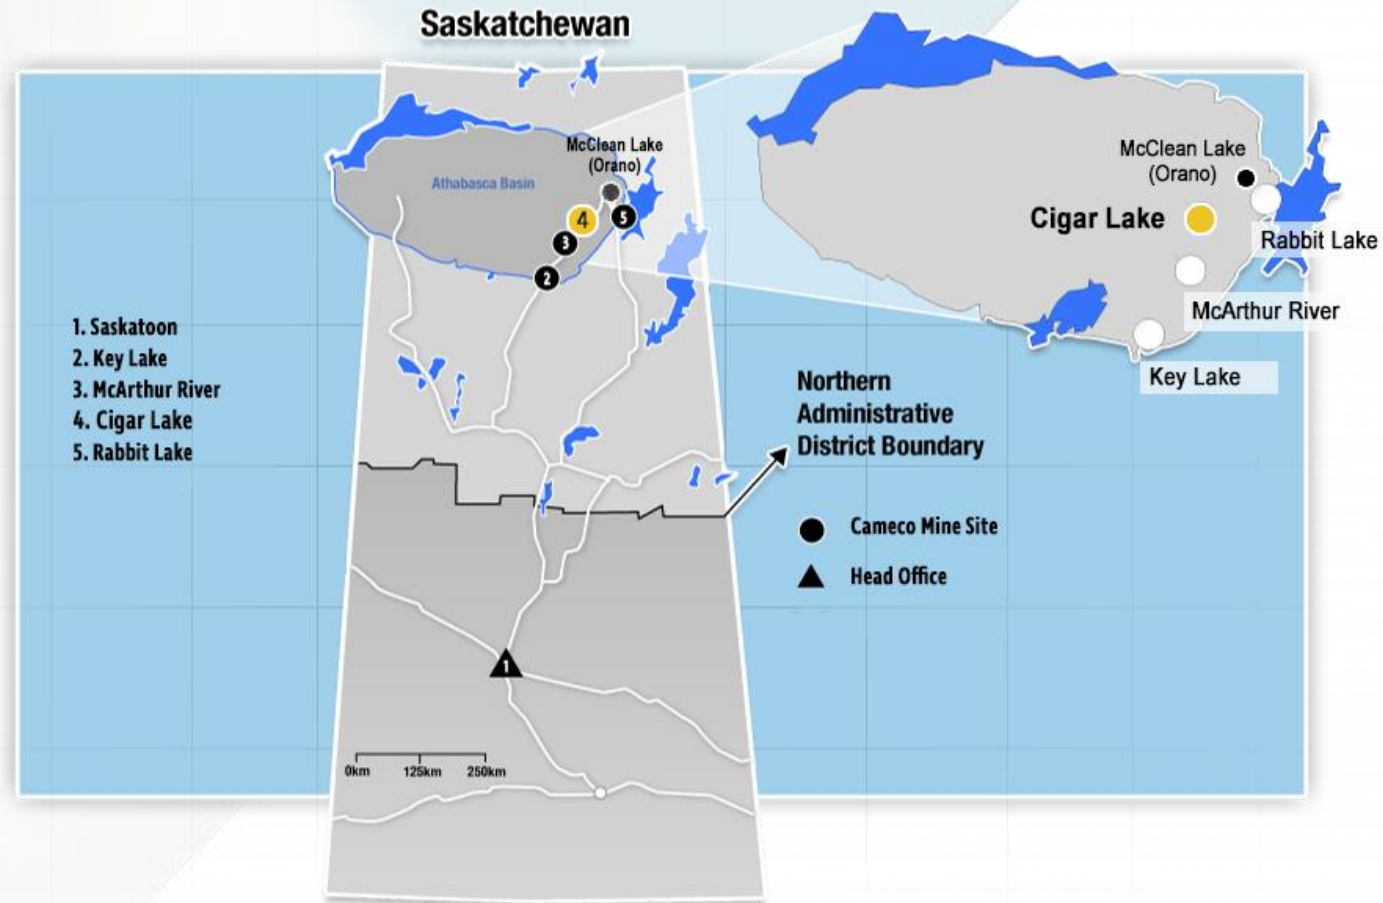

- Vision is aligned with the world's growing need for carbon-free energy
- Experienced operator of uranium mines and mills in northern Saskatchewan
 - Rabbit Lake
 - Key Lake
 - McArthur River
 - Cigar Lake

Energizing a clean-air world

Cameco Cigar Lake Operation

- One of the world's highest-grade uranium mines
- All ore processed at Orano McClean Lake mill

McClellan Lake Operation

- Cameco supports Orano's position that they are a qualified operator
- Mature management systems are in place
 - Maintaining safety of workers and the public
 - Effective measures for protection of the environment
 - Stakeholder engagement

JEB Tailings Management Facility

- Experienced TMF operation and decommissioning
 - Cluff Lake uranium mine/mill
- Established design, construction and operational processes

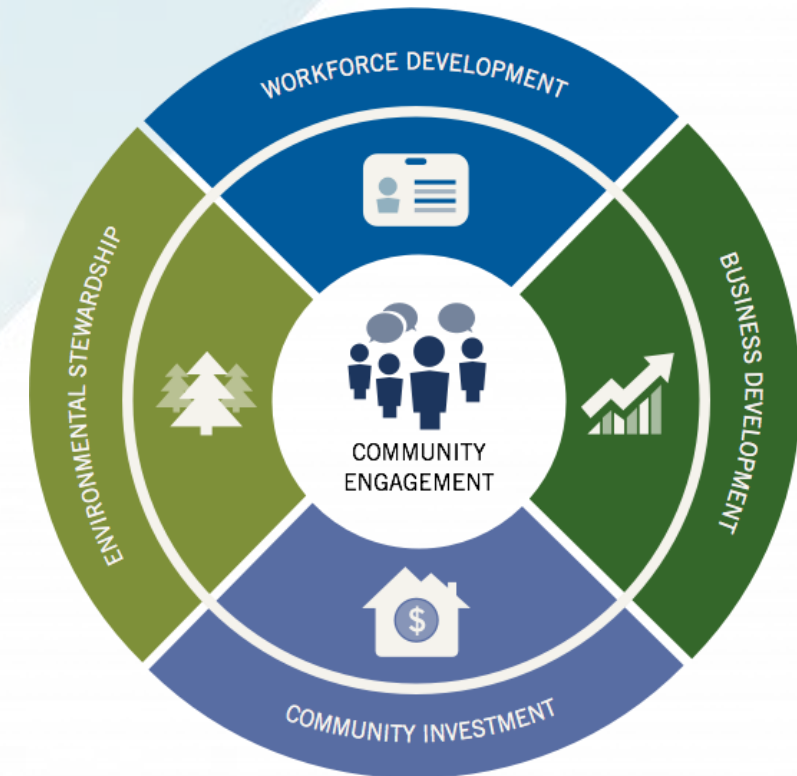

Stakeholder Engagement

- Northern strategy
- Public Information Programs
- Public Disclosure Protocols

Socio-Economic Benefit

- Collaboration Agreement with Athabasca Basin communities
- Confirms continued partnership among communities, Cameco and Orano

Environmental Stewardship

- Eastern Athabasca Regional Monitoring Program (EARMP)
- Community-Based Environmental Monitoring Program (CBEMP)

Conclusions

- Cameco agrees with Orano's submission that they are a qualified operator
- Cameco supports the requested licence amendment
- Strong management systems are in place to protect:
 - Workers
 - Public
 - Environment

Thank You
