Re: Cameco Fuel Manufacturing's licence renewal application (Nov 23-24, 2022 Hearing)

Dear President and Commission Members,

I am writing to you in support of CFM's 20-year licence renewal request. My name is Vincent Larose. I have 16+ years experience working with other employees to help make CFM a quality supplier of nuclear fuel. Participation in continuous improvement programs and open communication about our daily operations helps realize that goal.

Over the years I have witnessed considerable effort and success in CFM's commitment in building and sustaining a safety culture that is reflected in its day-to-day operations and performance. The company provides good stable employment for many families which in turn supports local business and its overall economy.

Cameco has also been a great supporter of its community directly. Cameco has made sizable donations to the Cobourg Northumberland Hills Hospital, the Port Hope Capitol Theater, participated in Annual Giving Campaign Programs and more. Community support has been ingrained in the company's culture and continues to be so today.

Taking into consideration the positive impact that CFM contributes within the community and the confidence, quality and environmental protection the company brings to the table doing its part in providing clean, sustainable and reliable energy, I believe CFM's 20-year licence renewal request deserves to be awarded.

Vincent Larose
