Subject: Canadian Nuclear Laboratories' application for a 10-year renewal of the Port Hope Project Waste Nuclear Substance Licence for the completion of the Port Hope Area Initiative - Reference Number: 2022-H-13.

Dear Secretariat:

I write this letter today in support of the application made by Canadian Nuclear Laboratories (CNL) for a ten (10) year renewal of the licence to continue the cleanup of historic low-level radioactive waste in Port Hope, Ontario as part of the Port Hope Area Initiative (PHAI).

As a community member of the PHAI for the past 4 years, I have observed first-hand the progress made for the benefit of the community. I have witnessed the economic and social benefits within the communities as a result of the activities of the PHAI. Through job creation, derived economic spin-off and infrastructure improvement, the municipality has received benefit from the ongoing project.

Additionally, many CNL staff live in the local area, they rent or own homes, participate in community events and shop locally, contributing further economic benefit.

The PHAI project has, and will continue to, create job opportunities through subcontractors during the licence extension period, including in areas such as landscaping, engineering, construction and administration.

Thank you for providing the opportunity to intervene in this matter,

Heather Kenny
