Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a near-lifelong citizen of New Brunswick, concerned about the future of our province.

In my opinion, I SUPPORT the 25 year license plan, as a sound a valid option for New Brunswick's future! Without the ability to make long-term plans (Far longer than the current 5 year mandatory licensing allows) it is nearly impossible to properly address our provinces growing power consumption needs! Nuclear power is far safer than public perception believes, and public outcry against such measures should be able to be ignored WHEN appropriate! And I believe this is definitely one of those times where it IS appropriate.

If you could please acknowledge receipt of this email that would be appreciated. For the same of such a receipt, my name is Phillip Belanger, currently residing in Moncton NB. If you have any further questions, let me know, I'll be happy to answer them to the best of my ability.

Thank you and goodbye.
