Subject: Intervention PLNGS Hearing Ref. 2022-H-02

To whom it may concern,

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive as well a member of the public concerned about nuclear and how climate change may impact the facility

It is the responsibility of us as Canadians here in NB to maintain our ability to adapt to the currents around global warning and as we become aware of new more efficient less pollution ways to get stuff done. Signing this will take that power out of our hands for a very long time leaving our children to the mercy of companies that are more concerned with their agenda than the actual people living in the communities.

My intention with this letter is to add my voice and opinion to your choice to not allow this to pass.

Thank you

Linda Melanson
