Subject: Intervention PLNGS Hearing Ref. 2022-H-02

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am an older person whose experience and judgement cannot be contributed ever again if the next hearing is in 2047. I have deep concerns about nuclear power stemming from my experience growing up under the threat of nuclear war, watching the news reports on major nuclear accidents and working as a contractor at a nuclear power plant for a short period of time.

The consequences of any accident involving radioactive material are dire. We all know this. Requiring nuclear facilities to renew their licenses every five years assures accountability to those of us who are potentially impacted by any gradual deterioration in adherence to rules, policies and procedures that ensure our safety.

For this reason, I strongly oppose the granting of a 25-year license to the nuclear power plant at Point Lepreau.

Thank you for your attention to my concerns.

Please acknowledge receipt of this email.

Sincerely,

Mary Ellen Stevenson
Oxford, NS
