Dear Sir/Madam:

Point Lepreau Operating License Renewal – 2022 H-02

Maritime Electric is an integrated electric utility that directly supplies approximately 84,000 customers, constituting approximately 90% of electricity consumers on Prince Edward Island. The Company purchases most of the energy it distributes to its customers from NB Power through various energy purchase agreements. Since 1991, Maritime Electric has had a participation agreement with NB Power for a portion of the energy supply from the Point Lepreau Nuclear Generating Station. Maritime Electric's interest in the application for license renewal derives from the fact that the electricity produced by the generating facility represents 15% of the Company's baseload energy requirements. The Point Lepreau Nuclear Generating Station also represents an important non-emitting electricity generation source.

With respect to these important factors of the role played by the Point Lepreau Generating Station, Maritime Electric strongly supports the renewal of the twenty-five year term Nuclear Power Reactor Operating License at the generating station.

Yours truly,

MARITIME ELECTRIC
