SUBJECT: Point Lepreau Operating License Renewal

Dear Commission Registry:

Please accept this letter of support as my written submission for the license renewal of the Point Lepreau Nuclear Generating Station.

Point Lepreau Nuclear Generating Station is a key asset in the NB Power generation fleet. providing safe, reliable, low cost and non-emitting electrical generation for the people of New Brunswick. The plant is extremely important to New Brunswick and Canada to help achieve greenhouse gas reduction targets, contribute global climate change mitigation and to help provide energy independence to our province and region.

They have a team of about 900 highly skilled and trained employees committed to public, employee and environmental safety. They recently surpassed 2 million person-hours without a lost time accident and were presented with several awards over the years

The Point Lepreau Nuclear Station is important to our current New Brunswick economy by providing high value jobs and helping to keep New Brunswick energy costs competitive as well as a critical asset to support the continued development of the SMR market and further establish New Brunswick and Canada as a Nuclear center of excellence leading sustainable and non-emitting energy solutions.

I support the license renewal for Point Lepreau.

Regards,

A handwritten signature in black ink that reads "Mark Wilson". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
