To whom it may concern,

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive waste and also concerned about radioactive emissions in the event of an accident.

We've seen in the last decade how climate change has a huge impact on our daily lives. In my region, I've seen floods, drought and lots of shore erosion caused directly by more intense storms because of our changing climate. This said, I am deeply concerned about how nuclear and how climate change may impact the facility

Please acknowledge receipt of this email.

Regards,

Julie Cormier
