Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive waste.

A 25 year license gives a large corporation too much power and not enough accountability to the people. This is a dangerous request, please do not allow this to go through. The people depend on your decision to have a voice. We should be moving away from nuclear power and moving toward renewable energy.
