1.0 BACKGROUND

Cameco is one of the largest global providers of the uranium fuel needed to energize a clean-air world. Utilities around the world rely on our nuclear fuel products to generate safe, reliable, emissions-free nuclear power. Together, we are meeting the ever-increasing demand for clean, baseload electricity while delivering energy solutions to support the world's net-zero goals.

We have interests in tier-one mining and milling operations that have the licensed capacity to produce more than 30 million pounds (our share) of uranium concentrates annually, backed by more than 464 million pounds (our share) of proven and probable mineral reserves. We are also a leading supplier of uranium refining, conversion and fuel manufacturing services.

For over 30 years, Cameco has been working to develop long-term relationships to build the trust and support of northern Saskatchewan communities. We believe that Indigenous communities should benefit from resource development on or near their traditional lands.

To guide our engagement, Cameco has developed a five-pillar strategy to provide communities with capacity building, and employment and business development opportunities for sustaining relationships within our operating areas. These five pillars are as follows:

- Workforce development
- Business development
- Community investment
- Environmental stewardship; and
- Community engagement.

Cameco has collaboration agreements in place that formalize these relationships with the communities in the specific areas in which we operate in northern Saskatchewan that are based on these five pillars. These agreements allow us to collaboratively determine the focus areas based on a community's unique needs. Through these agreements, we aim to optimize benefits to the community giving more certainty around investment and local business opportunities while enhancing long-lasting relationships.

2.0 SELF-ASSESSMENT

Cameco's self-assessment is based on the criteria outlined in REGDOC 3.2.2., which articulates that the requirements of the REGDOC do not apply to licence renewals with no proposed changes to existing operations as authorized by the Commission. Cameco's 2021 application and revised November 2022 letter is to renew the Rabbit Lake licence for a period of 20-years with no change to the authorized activities. In accordance with this application, Cameco's licence renewal would not result in any potential new or additional adverse impacts on the Indigenous or treaty rights of the Indigenous primary target audiences for the Rabbit Lake operation as described in Rabbit Lake's Public

Information Program and as identified in Section 5, and, as such, the requirements of REGDOC-3.2.2 are not triggered.

3.0 SCOPE

Specific to Rabbit Lake's 20-year licence renewal, this document is voluntary and designed to follow the guidance provided in the Canadian Nuclear Safety Commission's CNSC REGDOC 3.2.2, Indigenous Engagement.

4.0 ENGAGEMENT PRINCIPLES

Cameco's overall public engagement process is guided by a set of principles that were developed through roundtable consultation with northern opinion leaders. These principles are as follows:

- Open Channels for Communication

Cameco should engage with all northerners through various groups including political leadership, youth, and Elders and at all stages of activities from exploration to decommissioning – with the goal of building understanding and acting upon concerns.

- Make it Simple

Cameco should provide information simply and clearly in plain language avoiding technical language so lay people can understand the issues involved and provide meaningful comment.

- Build Capacity for Understanding

Cameco needs to find ways to assist in further building capacity of northern people to understand technical issues related to uranium mining operations and are able to share information with community members about these activities.

- Hear the Elders

Cameco recognizes the special stature of Elders in First Nation and Métis culture and should consult with Elders while building their understanding of the uranium mining industry.

- Include Youth

Youth represent the future for northern Saskatchewan. Cameco should support youth and enhance their understanding of the uranium mining industry, along with the opportunities and impacts involved.

- Speak and Hear Our Languages

In order to meaningfully engage northern people, Cameco should be able to both provide information and receive comments in traditional aboriginal languages.

These principles guide Cameco's communication and engagement efforts in northern Saskatchewan

5.0 IDENTIFICATION OF INDIGENOUS GROUPS

As set out in our Public Information Program, the primary audience and focus of engagement for the Rabbit Lake operation is the rights-bearing First Nation and Métis communities of the Athabasca Basin, which are located in the vicinity of the site. Specifically, these communities are:

- Black Lake Denesuline First Nation.
- Fond du Lac Denesuline First Nation.
- Hatchet Lake Denesuline First Nation.
- Northern Settlement of Camsell Portage.
- Northern Hamlet of Stony Rapids.
- Northern Settlement of Uranium City.
- Northern Settlement of Wollaston Lake (the adjoining communities of Hatchet Lake and Wollaston are located closest to the Rabbit Lake operation).

In June 2016, Cameco, and Orano Canada Inc. (Orano) signed a collaboration agreement with these communities known as the Ya'thi Néné Collaboration Agreement. The agreement builds on the Impact Management Agreement signed between Cameco, Orano and the communities in 1999.

This agreement is the primary agreement with the Athabasca Basin communities associated with Rabbit Lake. The agreement builds on the historic relationship as well as commercial relationships with businesses owned by the communities and follows the principles established within the 1999 Impact Management Agreement.

The community engagement and environmental stewardship pillar under the collaboration agreement defines Cameco's obligations in relation to engaging and informing the communities and provides a structure for the community to identify and bring forward issues related to the licensed activities at Rabbit Lake.

Engagement between Cameco and the communities under the collaboration agreement occurs primarily through the Athabasca Joint Engagement and Environment Subcommittee (AJES), previously the Athabasca Working Group, a joint committee of community and industry representatives that meets regularly to discuss operational and environment-related matters of importance to the communities and provides a channel for the communities to share traditional knowledge with the companies. In addition, the Ya'thi Néné Land and Resource Office was established to provide support to the subcommittee and the executive director is an AJES member. Also, the office has become a point of contact for the communities.

We discuss all aspects of our business on traditional territories, from exploration activities to decommissioning.

In addition to engaging with the Métis people in the vicinity of our operations through our collaboration agreement, Cameco also works with the Métis Local Presidents of the Uranium City Métis Local #50 and the Stony Rapids Métis Local #80. Cameco continues

to focus our engagement on those in the local vicinity of the operation but does provides information and responds to the Métis Nation of Saskatchewan if there is an expressed interest.

Cameco employees at Rabbit Lake, of which approximately half are residents of northern Saskatchewan, and long-term contractors at Rabbit Lake are also part of the primary target audience.

While the rights-bearing First Nation and Métis communities of the Athabasca Basin are the primary audience for Rabbit Lake, Cameco considers the general public of the Northern Administrative District (NAD) and the province of Saskatchewan generally to be a secondary audience. The NAD is a large region (approximately the size of Germany) with a dispersed population and many traditional and resource-based land users. The population of the NAD is approximately 36,500, including people of First Nation (Cree and Dene), Métis and non-Indigenous origin.

Cameco provides information and responds to inquiries from the NAD communities, organizations and groups that may express interest in our operations through our websites and social media channels and direct engagement when appropriate.

Cameco has worked with the local communities for many years and, with the signing of agreements, reaffirms and formalizes these long-standing relationships. In 2012, a collaboration agreement was signed with the community of Pinehouse (the northern village of Pinehouse and the Kineepik Métis Local), with English River (ERFN) at the end of 2013 and with the Lac La Ronge Indian Band (LLRIB) in June 2017. Similar to the Ya'thi Néné Collaboration Agreement, subcommittees were established with members of the local community, Pinehouse Joint Engagement Subcommittee (JIES) and ERFN Joint Engagement and Environmental Subcommittee (JIEES). The LLRIB has the Traditional Lands and Resource Advisory Committee; Cameco will continue to engage this already established group. Under these CAs, a process for engagement was developed to update and help ensure a clear understanding of Cameco's operations and activities.

In addition, Cameco engages with the Northern Saskatchewan Environmental Quality Committee (NSEQC), which was established pursuant to a recommendation of the Joint Federal-Provincial Panel on Uranium Developments in 1997 to foster better communication between northerners, the government, and the uranium mining industry. There are representatives from 32 northern municipal and First Nation communities on the NSEQC. The Saskatchewan Northern Mines Monitoring Secretariat (NMMS) co-ordinates the activities of the NSEQC that may include site visits, workshops, and liaisons with other jurisdictions. Members of the NSEQC are appointed by the provincial government through the NMMS, based on recommendations from community leaders. Members that visit uranium mining operations in the Basin are encouraged to report back to their communities and the larger NSEQC.

6.0 ENGAGEMENT METHODS

Cameco uses a variety of well-developed tools to communicate information as set out in our public disclosure protocol, that stems from the public information program. While

traditional media and evolving social media formats are used, the heart of Cameco's engagement efforts in northern Saskatchewan continues to be through face-to-face engagement.

The current global pandemic continues to persist and disrupt the daily lives of northern communities and Cameco continued to adapt our communication tools to ensure the health and safety of all participants.

The communication tools listed below have been employed throughout the licence term and continue to be incorporated into Cameco's ongoing engagement activities for the Rabbit Lake operation.

- Conventional media; newsletters, magazines, newspapers
 - Quarterly Opportunity north articles (throughout the licence term until the magazine was retired in 2019)
 - Ya'thi Néné Newsletter (from its inception in 2020)
- Postings to Cameco's website and the establishment of a specific northern site, established in 2015
 - Rabbit Lake licensing renewal page developed in 2022
 - Option to submit general inquiries through the website
- Social media is used to update communities on information that they have expressed an interest or is of interest
 - Texts
 - Phone calls
- Contributions to community owned Facebook pages
- Operation fact sheets
- CA annual reports
- Site tours on request from formal committees and educational institutions.
- Meetings and workshops (virtual and in-person) in northern communities.
 - Hands on classroom demonstrations
- Meetings with community leadership and membership.
- Responding to general inquiries and ad hoc interactions with northern communities
- Supporting and increasing accessibility for northerners through Cameco satellite offices
- Incorporating visual aids – videos and virtual tours.
- Providing Dene and Cree translations

Cameco will continue to strive to build strong relationships in the north through our public information program and our commitments to maintaining open channels of communication with all interested and potentially interested parties.

7.0 SUMMARY OF INDIGENOUS ENGAGEMENT ACTIVITIES TO DATE

In April 2021, Cameco applied to the CNSC to begin the process to renew the Rabbit Lake licence. Cameco is requesting a 20-year licence term, and the hearing is scheduled to be held in June 2023. The current licence is valid until October 31, 2023.

Specific to the licence renewal, Cameco engaged with the local communities, Indigenous groups, and other interested groups early in the relicensing process. Cameco also continued to provide information related to the operation and worked to address questions raised with respect to performance (e.g., environmental protection, radiation protection, and the health and safety of the workforce). This engagement began with formal meetings with the primary and secondary target audiences, informing them of the upcoming licensing activity, providing links to relevant information on Cameco's northern website, and advising of the opportunities for participation and inviting them to contact Cameco for further information. During these activities, discussions focused predominately on agreement benefits, namely, employment, investment and business opportunities.

With respect to licence term, we continued to hear uncertainty expressed by the communities regarding Cameco's original request for indefinite licence terms and how they would fit within the existing regulatory and engagement framework. In November 2022, in response to the feedback received, Cameco revised our original request and asked for the licence to be renewed by the CNSC for a 20-year term.

In addition to our formal engagement, Cameco also maintains a presence in northern Saskatchewan through our Sustainability and Stakeholder Relations Department that has satellite offices in Black Lake, Fond du Lac, Hatchet Lake, Pinehouse and ERFN. Cameco has designated the manager, community, and Indigenous engagement as the representative for Rabbit Lake for Indigenous engagement. The Rabbit Lake general manager and site staff, in addition to the corporate Safety, Health, Environment and Quality Department, provide the consistent technical support for all engagement activities related to the operation.

The table below provide a synopsis of some of the engagement during the licence term specific to the Rabbit Lake operation by members of Cameco's team:

Date	Activity	Overview
February 6, 2023	AJES Q1 Meeting (Stony Rapids)	Cameco discussed the amended 20-year licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. Cameco also provided a general update on Rabbit Lake. <i>Discussion focused on licence term and site decommissioning.</i>
January 11, 2023	Ya'thi Néné Board Meeting	Cameco hosted a meeting with the Ya'thi Néné Board of Directors and Executive Director to discuss the amended 20-year licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. <i>The discussion focused on length of term requested and the CNSC proposed mid-term review as raised by the CNSC during the November community tours.</i>
December 5, 2022	AJES Q4 Meeting (Saskatoon/Teams)	Cameco discussed our 20-year licence renewal application for the McArthur River, Key Lake, and

		Rabbit Lake operations. Also, a general site updates on Rabbit Lake was presented that included operational events/incidents. <i>The discussion amongst the representatives focused on the 20-year licence term being requested.</i>
November 29, 2022	JIEES Q4 Meeting (Saskatoon/Teams)	Cameco discussed our 20-year licence renewal application for McArthur River, Key Lake, and Rabbit Lake in addition to general site updates. <i>The discussion focused on licence term.</i>
November 10, 2022	JIES Q4 Meeting (Cameco presented on our 20-year licence renewal application for McArthur River, Key Lake, and Rabbit Lake. General site updates were also provided. <i>The discussion focused on licence term.</i>
November 23, 2022	Hatchet Lake/Wollaston Lake Community Meeting	Cameco hosted community meetings in northern communities to discuss our amended 20-year licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. General site updates and community benefits were also presented. <i>Discussions focused primarily on the community benefits under the agreements and licence term.</i>
November 22, 2022	Fond du Lac Community Meeting	
November 22, 2022	Stony Rapids Leadership Meeting	
November 22, 2022	ERFN Community Meeting	
November 22, 2022	LLRIB Leadership Meeting	
November 21, 2022	Black Lake Community Meeting	
November 21, 2022	Uranium City Community Meeting	
November 21, 2022	Pinehouse Community Meeting	
August 31, 2022	AJES Q3 Meeting, Rabbit Lake Site Visit	Cameco hosted a site update and surface tour. Cameco presented on the Rabbit Lake operation, which included operational events/incidents and environmental performance. Cameco also discussed the indefinite licence renewal application for McArthur River, Key Lake, and Rabbit Lake. <i>The discussion focused on site facilities and the requested licence term.</i>
June 28, 2022	AJES Q2 Meeting	Cameco discussed our indefinite licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. In addition, Cameco presented

		a Uranium 101 overview and general site updates. <i>Discussion focused generally around uranium mines and mills and licence term, specifically, benefits to the community.</i>
March 2, 2022	NSEQC General Meeting (La Ronge/Teams)	Cameco participated in the general meeting and presented on the indefinite licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. In addition, Cameco presented a Uranium 101 overview and general site updates. <i>The discussion focused on mines and mills generally, no further dialogue on the licence application.</i>
February 10, 2022	AJES Q1 Meeting (Teams Meeting)	Cameco discussed our indefinite licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations and provided general site updates. <i>Discussion focused on the licence term requested.</i>
December 8, 2021	AJES Q4 Meeting (Teams Meeting)	
October 28, 2021	JIEES Q3 Meeting (Saskatoon/Teams Meeting)	
October 26, 2021	JIES Q3 Meeting (Saskatoon/Teams Meeting)	
October 14, 2021	AJES Q3 Meeting (Teams Meeting)	Cameco discussed our indefinite licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations and provided a general site update. <i>Discussion focused on licence term, in addition to the associated community benefit and regulatory process.</i>
October 3, 2021	LLRIB Committee Meeting (La Ronge/Teams Meeting)	Cameco presented our indefinite licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations and general site updates. <i>Discussion on licence term focused on how the request relates to community benefits.</i>
June 29, 2021	AJES Q2 Meeting (Teams Meeting)	Cameco presented our licence renewal application for the McArthur River, Key Lake, and Rabbit Lake operations. In addition, provided a general site update. <i>Discussion around the COVID-19 pandemic as it relates to the operations and the licence term requested.</i>
December 17, 2020	AJES Q4 Meeting (Teams Meeting)	Cameco provided general site updates. <i>Discussion focused on the COVID-19 pandemic as it relates to the operation.</i>
November 5, 2020	JIES Q4 Meeting (Teams Meeting)	
October 29, 2020	JIEES Q4 Meeting (Saskatoon/Teams Meeting)	

June 29, 2020	AJES Q2 Meeting (Teams Meeting)	Cameco provided a general site update. <i>Discussion focused on the COVID-19 pandemic as it relates to the operation, in addition to, the temporary suspension of Eagle Point pumping, as no decisions had been made.</i>
December 5, 2019	AJES Q4 Meeting (Teams Meeting)	Cameco provided a general site update. <i>Discussion focused on activities during care and maintenance.</i>
October 17, 2019	AJES Q4 Meeting (Teams Meeting)	
October 11, 2019	Ya'thi Néné Meeting (Saskatoon)	Cameco hosted a meeting with the Ya'thi Néné Land and Resource Executive Direction. <i>Discussions focused on environmental monitoring programs.</i>
September 26, 2019	AJES Q3 Meeting (Rabbit Lake)	Cameco hosted a general site update and underground tour of the Eagle Point mine. <i>Discussion focused on site environmental monitoring programs.</i>
September 5, 2019	CNSC Regulatory Oversight Report Meeting (Prince Albert)	Cameco attended the CNSC led outreach to discuss performance for mines and mills in Canada, 2018.
September 4, 2019	CNSC Regulatory Oversight Report Meeting (Prince Albert)	
July 9, 2019	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided site updates.
June 26, 2019	AJES Q2 Meeting (Teams Meeting)	Cameco provided a general site update. <i>Discussion on a variety of topics, but the focus was on the temporary suspension of Eagle Point pumping, as no decisions had been made.</i>
February 12, 2019	AJES Q1 Meeting (Teams Meeting)	
November 28, 2018	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided general site updates.
November 20, 2018	AJES Q4 Meeting (Teams Meeting)	Cameco provided a general site update. <i>Discussion around care and maintenance activities.</i>
September 24, 2018	AJES Q3 Meeting (Teams Meeting)	
July 24, 2018	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided general site updates.
June 7, 2018	AJES Q2 Meeting (Saskatoon)	Cameco provided a general site update and discussed the site's 2017 performance.
June 6, 2018	Environmental Workshop (Saskatoon)	Cameco and Orano hosted an environmental workshop in Saskatoon for the AJES, JIES, JIEES and LLRIB subcommittee representatives. <i>Discussions focused on the decommissioning process.</i>

February 28, 2018	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided general site updates. <i>Discussion focused on environmental monitoring.</i>
February 26, 2018	AJES Q1 Meeting (Teams Meeting)	Cameco provided a general site update.
Fall/Winter 2017	Northern Tour	Cameco's Northern Tour visited nine communities in northern Saskatchewan (the Athabasca Basin stops were rescheduled to February 2018). The focus of the 2017 tour was to discuss the changes to Cameco's operations due to current economic considerations. In addition, Cameco carried out environmental labs in the schools and partnered with the Red Cross and Saskatchewan Roughriders to encourage anti-bullying in northern schools. <i>Discussion on a variety of topics including continuation of the benefits received under the collaboration agreements.</i>
November 29, 2017	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided its Uranium 101 presentation in addition to site updates. <i>Discussion focused on tailings management and the Above Ground Tailings Management Facilities.</i>
November 21, 2017	AJES Q4 Meeting (Teams Meeting)	Cameco provided a general site update. <i>Discussion focused on the contaminated waste haul from Cigar Lake to Rabbit Lake and the tailings management facilities.</i>
November 6, 2017	Ya'thi Néné Lands and Resource Office (Saskatoon)	Cameco and Orano met with the Ya'thi Néné Lands and Resource Office to discuss its performance for mines and mills in Canada in 2016.
September 19, 2017	AJES Q3 Meeting/Community Meeting (Hatchet Lake)	Cameco provided a general site update. <i>Discussion focused on care and maintenance and environmental monitoring.</i>
February 7, 2017	AJES Q1 Meeting (McLean Lake)	Cameco provided a site update during the McLean Lake site visit. Discussion focused on care and maintenance and environmental protection.
January 13, 2017	Ya'thi Néné Land and Resource Office (Saskatoon)	Cameco met with the Ya'thi Néné Land and Resource Executive Director. <i>Discussion focused on the regulatory framework, environmental protection, and environmental monitoring at the operations.</i>
December 4, 2016	AJES Q4 Meeting (Fond du Lac)	Cameco provided a general site update. <i>Discussion focused on the proposed underground waste from Cigar Lake to the Rabbit Lake Above Ground Tailings Management Facility.</i>
October 26, 2016	AJES Q3 Meeting (Saskatoon)	

October 2, 2016	AJES Q3 Meeting (Saskatoon)	
April 15, 2016	Rabbit Lake Site Tour (Cumberland House)	Group from the Charlebois Community School toured the site.
March 2, 2016	AWG Meeting (Prince Albert)	Cameco presented a general site update. <i>Discussion focused on the crown pillar failure and workforce development, specifically employment and HR processes.</i>
December 9, 2015	AWG Meeting (Prince Albert)	Cameco presented a general site update. <i>Discussion around water treatment and what environmental safeguards exist for treated effluent that is released.</i>
October 14, 2015	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided site updates. <i>Discussion in relation to tailings management facilities; consolidation, facility design, water management and frozen tailings.</i>
October 2015	Northern Tour	Cameco's Northern Tour visited nine communities in northern Saskatchewan, three in the Athabasca Basin. The focus of the 2015 tour was on the nuclear fuel cycle within northern Saskatchewan (exploration, mining, milling, mine safety, environmental monitoring, radiation, and reclamation) through a science fair concept aimed at high-school students. Rabbit Lake staff assisted in a booth that explained the operation's role in mining and milling including a display on electrical safety.
June 10, 2015	NSEQC Rabbit Lake Site Tour (Athabasca)	Cameco hosted a general site update and surface tour for the 40 years of operation celebration. The site tour highlighted waste management facilities, including tailings and reclamation efforts. <i>Discussion on a variety of topics including tailings management facilities and frozen tailings.</i>
May 27, 2015	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and presented a Uranium 101 overview and general site updates.
May 7, 2015	Rabbit Lake Site Tour (Hatchet Lake)	Group from the Father Megret High School toured the operation.
April 16, 2015	Rabbit Lake Site Tour (Black Lake)	Group from the Father Porte School toured the operation.
March 23, 2015	Rabbit Lake Site Tour (Fond du Lac)	Group from the Father Gamache Memorial School toured the operation.
February 19, 2015	AWG Meeting (Prince Albert)	Cameco provided a general site update. <i>Discussion focused on the collaboration agreement.</i>

December 12, 2014	AWG Meeting (Prince Albert)	Cameco provided a general site update with a focus on tailings management. <i>Discussion on water released and effluent treatment.</i>
October 2014	Northern Tour	Cameco's Northern Tour visited twelve communities in northern Saskatchewan, four in the Athabasca Basin. The focus of the 2014 tour was on the creation of a Northern Trust Fund, workforce development and site updates.
October 8, 2014	NSEQC General Meeting (La Ronge)	Cameco participated in a general meeting and provided site updates, focus on tailings management facilities. <i>Discussion focused on liners used, requirements of effluent discharge and understanding reverse osmosis technology.</i>
August 15, 2014	NSEQC Rabbit Lake Site Tour (Athabasca Basin)	Cameco hosted a site update and underground tour. <i>Discussion on a variety of topics including tailings management facilities, environmental monitoring, the B-Zone Pond, site projects, water management, and regulatory requirements.</i>
July 14, 2014	Rabbit Lake Site Tour (Pinehouse)	Cameco hosted a Pinehouse Business North site tour regarding environmental waste management
April 29, 2014	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and provided general site updates. <i>Discussion focused on Links Lake and transportation.</i>
February 26-27, 2014	NSEQC General Meeting (La Ronge)	Cameco participated in the general meeting and presented a Uranium 101 overview during a workshop and provided general site updates. <i>Discussion focused on building understanding and capacity on the mines and mills in northern Saskatchewan.</i>
February 11, 2014	AWG Meeting (Prince Albert)	Cameco presented a general site/project update. <i>Discussion focused on water management, tailings management and effluent treatment and discharge.</i>
December 11, 2013	AWG Meeting (Prince Albert)	Cameco provided general site updates. <i>Discussion focused on Cameco's site Elder program and community benefits, specifically workforce development and community investment.</i>

8.0 PLANNED INDIGENOUS ENGAGEMENT ACTIVITIES

Cameco strives to proactively engage Indigenous communities in a variety of ways to provide information, to elicit feedback and to respond meaningfully. Cameco recognizes and respects the rights and related interests of Indigenous communities and works to establish open dialogue to ensure any issues or concerns can be addressed appropriately. To continue working towards open dialogue and fostering meaningful relationships, Cameco is planning the following engagement activities:

- Collaboration Agreement Subcommittee Meetings
 - Cameco will continue to meet with the agreement subcommittees quarterly (or as needed) as defined through the process outlined in the agreements.
- Community Meetings
 - Cameco will host meetings with Indigenous groups as identified in Section 5, to continue to provide information directly to the local Indigenous communities.
 - Community meetings were held in November 2022 and January 2023.
- Correspondence (via email)
 - Cameco will send correspondence to Indigenous groups following the receipt of PFP funding, as follow-up to their application.
 - Correspondence will look to provide more information about the licence application, learn about the respective Indigenous group's interests, offer to meet with Indigenous groups and will respond to questions or concerns.
- Site Tours:
 - Site tours will be offered and coordinated upon request.
 - AJES last toured the Rabbit Lake operation in October 2022.
- Cameco Relicensing Website
 - Cameco will continue to provide information on the licence renewal, program summaries and other related information on the Cameco North website.

9.0 PROPOSED INTERIM REPORTING SCHEDULE

Cameco will keep the CNSC informed of our Indigenous engagement in support of Rabbit Lake's 20-year licence renewal in verbal updates provided during CNSC Staff and Cameco joint meetings.

10.0 MATERIAL CHANGE UPDATES TO THE INDIGENOUS ENGAGEMENT REPORT

As noted earlier in the document, the Rabbit Lake licence renewal request do not trigger the requirements of RD-3.2.2, and this report is being submitted voluntarily by Cameco. As such, there is no requirement to provide updates regarding changes to the activities noted in this report.

11.0 INDIGENOUS ENGAGEMENT FOR THE COMMISSION MEMBER DOCUMENT (CMD)

A summary of the Indigenous engagement activities completed in support of Rabbit Lake's 20-year licence renewal application will be provided in the site's CMD.
