**Re: Intervention in Support of Ontario Power Generation's Application for the Renewal of the Darlington Nuclear Generating Station Power Reactor Operating Licence**

Dear Secretary of the Commission,

Community Living Oshawa/Clarington (CLOC) is pleased to submit this written intervention in strong support of Ontario Power Generation's (OPG) application for the 30-year renewal of the Power Reactor Operating Licence for the Darlington Nuclear Generating Station (NGS).

As a non-profit organization dedicated to supporting children and adults with developmental disabilities in the Oshawa and Clarington regions, CLOC has had a long-standing partnership with OPG. Over the years, OPG has consistently demonstrated a strong commitment to our community, and CLOC specifically, through various initiatives and collaborations. OPG employees have hosted internal awareness events, with proceeds donated to support the vital work of CLOC. OPG partnered with CLOC for many years as the host and co-organizer of the Steps to Inclusion walk-a-thon, held on the accessible nature trails at the Darlington property. Not only did OPG employees help to arrange the event, but they volunteered on the day of, participated in the event and raised pledges to benefit CLOC. These events helped CLOC to enhance our services and focused on inclusion and community wellbeing. Additionally, OPG has contributed financially to specific CLOC programs or projects that have directly benefited the people we support by sponsoring our fundraising events or responding to direct funding requests.

The ongoing partnership with OPG has had a significant positive impact on our ability to provide crucial services and support to individuals with developmental disabilities in our community. OPG has consistently shown itself to be a responsible and engaged corporate citizen, dedicated to the well-being of the communities in which it operates.

Based on our direct and positive experiences working with OPG, we have witnessed their commitment to safety, environmental responsibility, and community engagement firsthand. We are confident that OPG operates the Darlington NGS with the highest standards of safety and environmental stewardship, and we believe the renewal of their operating licence for a 30-year term is in the best interest of our region and the province as a whole.

We trust that the Canadian Nuclear Safety Commission will carefully consider OPG's application and our positive experiences as a long-term community partner. We believe that a renewed licence for the Darlington NGS will not only ensure a reliable source of energy but also allow OPG to continue its valuable contributions to organizations like ours in the local community.

Thank you for considering our intervention.

Sincerely,

Terri Gray  
Executive Director  
Community Living Oshawa/Clarington
