Submission

Written Submission: Given the pace of technological change and development of means of energy production, along with the advance of funding arrangements aimed at limiting damage to our earth's climate, I think licensing for 30 years is a vast overstep and should not be allowed. Alternatives to nuclear power and funding for them are opening up so fast there is no need for further development or refurbishment of nuclear power. Plus, the lack of a believable plan to handle nuclear wastes means there should be no extensions that result in even more waste than we have already.

Additional Comments

Where did you hear about this opportunity to participate?: Other

Other: Citizen organization.

Do you have any other comments, questions or suggestions?: See note about lack of room for data on submission form in comments above.
