Tom Kelly**

À l'égard des

Les Laboratoires Nucléaires Canadiens

Demande de renouvellement du permis
d'exploitation d'établissement de recherche
et d'essais nucléaires pour les Laboratoires
de Chalk River

Audience publique de la Commission

23-25 janvier 2018

Filed online on December 7, 2017

Subject: Application by Canadian Nuclear Laboratories for the renewal

From: Mr. Tom Kelly

I am interested in speaking to the panel at this event to show both my support of nuclear energy and the new direction that Chalk River has decided to go with Small molten salt thorium reactors.

I also want to express my concern about how the regulatory body will be providing very little oversight and have much less power in the future.

I also have concerns about the nature of asking international for profit companies to take care of our long term nuclear waste and future nuclear reactors. I don't trust them to take care of Chalk river labs in the long run.
