*Re: Public Meeting March 23, 2026 -- Regulatory Oversight Report on the Canadian Nuclear Power Generating Sites for 2024*

I am pleased to provide this letter of support acknowledging Bruce Power's continued commitment to meeting the regulatory requirements of the Canadian Nuclear Safety Commission. Bruce Power has demonstrated consistent leadership in nuclear safety, regulatory compliance, and environmental responsibility through its ongoing operations and long-term planning at the Bruce Nuclear Generating Station.

Bruce Power plays a critical role in Ontario's electricity system by providing clean, reliable baseload power that supports provincial energy security and Canada's net-zero objectives. In addition, Bruce Power's work in the production of medical and industrial radioisotopes supports critical health care, research, and industrial applications across Canada and internationally.

I am supportive of Bruce Power's pre-development work related to the proposed Bruce C Nuclear Project. This work aligns with Ontario's Affordable Energy Future and reflects the continued need for clean, reliable, and affordable nuclear generation. The Town of Saugeen Shores recognizes the importance of early engagement, rigorous assessment, and regulatory transparency as this work advances, and looks forward to continued collaboration with Bruce Power throughout the Impact Assessment process.

On behalf of Council, I am proud to have Bruce Power as a longstanding corporate partner within our community and look forward to continuing our strong working relationship in the years ahead.

Sincerely,

Luke Charbonneau, Mayor  
Town of Saugeen Shores
