Commission Meeting

Réunion de la Commission

May 2026

Mai 2026

As a volunteer on the BWXT Peterborough Community Liaison Committee (CLC), I have seen first-hand the importance of community engagement. The involvement of many different stakeholders is key. For example, I am a local university student and I'm happy to bring the youth perspective to our conversations. In our membership I can see that the broader community is represented and engaged.

Our meetings are full of topics of interest to all CLC members. I learned about the Annual Compliance Reports that BWXT publishes to the public which gave me a better understanding about emissions, public dose, and monitoring. Sharing this information with our committee was very valuable for knowledge about these processes. As members we provided feedback on how to demonstrate transparency in monitoring. I saw the most engagement with CLC members having the opportunity to provide ideas for community outreach activities. There were many spirited discussions, and creative ideas were suggested for BWXT to show their commitment to community. I particularly enjoyed attending "The Local Impact of Nuclear Medicine" event in September 2025. It was wonderful to see the community at large attend as information was shared about the crucial role of BWXT's Target Delivery System in providing life-saving nuclear medicine.

Sincerely,

Lora Vassiliadis
